

Work Collaboration & Programme Management Software that works for everyone

Verto is a Cloud based work collaboration and programme management system with over 50,000 users across the UK. It is entirely user configurable as a software service solution and supports all project methodologies which can be fully embedded into the system.

Verto^{Go} is the most effective way for project teams to collaborate. For project managers on the go and colleagues working round the clock, the mobile friendly service provides availability for all colleagues to connect.

On-The-Go Project Management

- Fully responsive on all devices
- Chat and instant messaging
- Project status updates
- Milestone and task management
- Alerts, actions and calendar management
- Risk and Issue management
- Document storage and sharing
- Native App IOS and Android

Instant messaging and chat features for team collaboration and mobile working allows you to keep updated, brainstorm and even share files with colleagues.

Verto^{Pro} is the complete portfolio, project and programme management solution for the entire organisation. This upgraded system provides control and governance for the PMO and links the delivery community with the stakeholder community.

End-To-End Programme Management

- Real time programme information
- Performance planning
- Benefit management
- Full approvals and audit trail
- Resource management and scenario planning
- Pipeline and timesheet management
- Dashboard status and reports
- Document storage and sharing

Centralise everything in one place. Track critical paths, task progress, completion and monitor costs at any given time across all active projects.

Digital Collaboration Platform

VertoGrid is a cloud-based work collaboration and programme management service which enables organisations to manage and coordinate their project portfolios, centrally, regionally and locally across multiple sites and locations.

It links stakeholder communities with their project delivery teams and provides comprehensive, real-time reporting at all levels across the entire portfolio. Verto replaces countless emails, spreadsheets and templates with a simple to use, accessible service that that supports mobile and agile working

3 KEY BENEFITS OF USING VERTOGRID

1 Local programme management for each region and partner organisation

VertoGrid enables each regional office and member organisation to have their own instance of Verto to share documents and manage their projects and programmes. This can be specifically tailored to their needs, using their preferred approach and methodology.

2 Connects organisations and teams across project portfolios

VertoGrid seamlessly connects stakeholders and project teams across each region. Individual users can collaborate on shared projects, documents, chat, messages and report on programmes and projects across their department or region.

3 Local, regional and national reporting

Each organisation can record project information such as benefits and costs into a common set of fields and produce region-wide reporting across their VertoGrid network.

Developed in partnership with organisations across the UK public and private sector

VERTO IS USED BY 50,000+ USERS

across numerous NHS, Local Authority and private sector organisations
