

# Digital Collaboration Platform

VertoGrid is a cloud based service providing system wide collaborative working and PMO governance for STPs and ICS regions and their partner organisations. It replaces countless emails, spreadsheets and templates with a simple to use service that allows teams to share and keep everything in one place and report directly from the system.

Developed in partnership with STPs, VertoGrid supports collaborative working both locally and regionally across member organisations:

## 3 KEY BENEFITS OF USING VERTOGRID

### 1 Local programme management for each organisation

VertoGrid enables each STP or ICS member organisation to have their own instance of Verto to share documents and manage their projects and programmes. This can be specifically tailored to their needs, using their preferred approach and methodology.

### 2 Connects organisations and teams across the STP or ICS

VertoGrid seamlessly connects each organisation across the STP or ICS region. Individual users can collaborate on shared projects, share documents, chat, message and report on programmes and projects across their region.

### 3 Local and STP wide reporting

Each organisation can record benefits and costs into a common set of fields and produce region-wide reporting across their VertoGrid network.

Developed in partnership with STP organisations, Verto is also used by some

# 30,000 PUBLIC SECTOR USERS

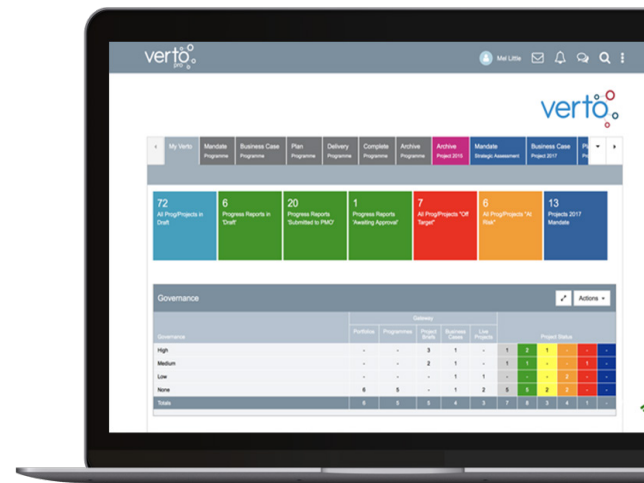

across numerous CCGs, Councils and NHS organisations

# Verto Key features

## PMO control and governance

Verto provides governance, assurance and risk management for programme portfolios across the organisation:

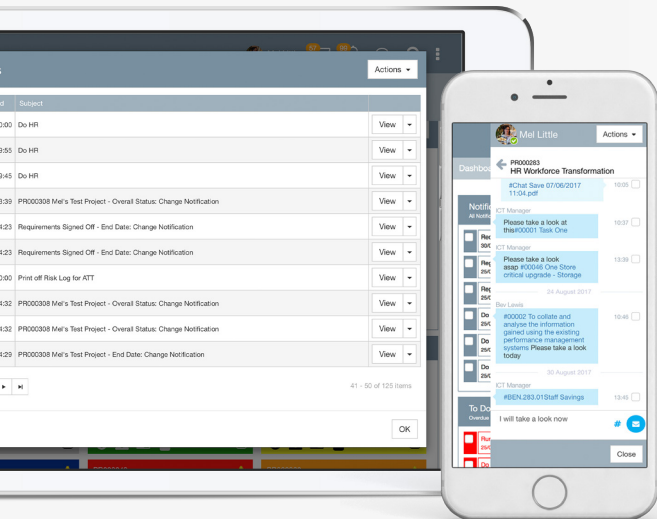

- Real time programme information
- Performance planning
- Benefit management
- Full approvals and audit trail
- Resource management and scenario planning
- Pipeline timesheet management
- Dashboard status and reports
- Document storage and sharing

## Mobile working

Verto is the most effective way for project teams to collaborate:

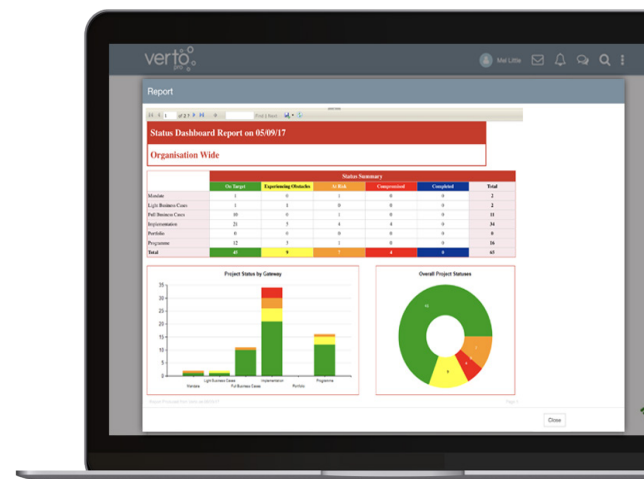

- Fully responsive on all devices
- Chat and instant messaging
- Project status updates
- Milestone and task management
- Risk and Issue management
- Document storage and sharing
- Alerts, actions and calendar management
- Native App IOS and Android

## Management reporting

Verto produces comprehensive reports, management information and automated NHS returns:

- National and Local Indicator data links to projects
- Data push directly from CSU and other sources
- Automatic QIPP reporting
- Reports ISFE return data
- Cashable Benefits directly linked financial savings reports
- Regional and cross STP reporting

VertoGrid enterprise licences are available on a licence purchase or service rental basis. For further information, to speak with our users or access one of our demonstration sites please contact us directly:
